

DEXIS Imprevo

with IS ScanFlow

The intraoral scanner
**that's changing
patient conversations**

Built to empower your patient workflows with clarity, confidence,
and a clear path to “yes”

DEXIS Imprevo

Redefining digital dentistry with precision, speed and versatility

Capturing a scan isn't just about data. It's about delivering a moment of clarity that your patients can see and believe in.

Imprevo opens the dialogue. It helps your patients visualize their care, trust your recommendations, and move forward with confidence.

What you'll gain with Imprevo

Greater clinical efficiency

Faster scans, fewer rescans, and more accurate impressions.*

Enhanced patient comfort

Smaller tip size and less time spent scanning — patients notice the difference.*

Stronger lab collaboration

Tailored prescriptions and clearer scans means your lab gets exactly what they need to deliver fantastic results.*

Future-ready software

IS ScanFlow evolves with your practice, unlocking capabilities.

Clearer scans. Richer color. Faster scan times.

Capture better data faster with Imprevo's breakthrough advancements in imaging and parallel processing technology.*

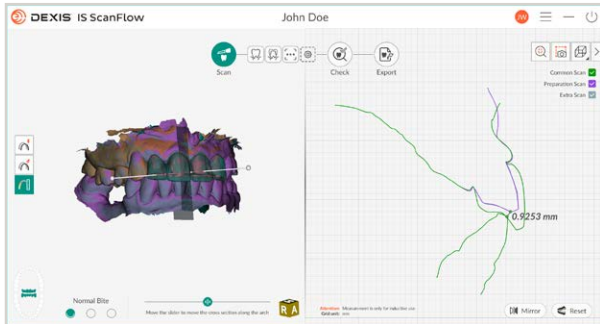

“Wow!!! What an improvement - better color, the margin between teeth and gingiva is fast to scan and clear. Very impressed with this scanner.”

-Dr. Beat R Kurt

Smart technology, accurate results

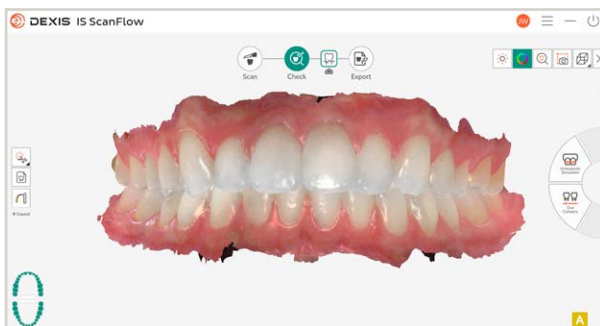

Advanced scanning algorithms mean you get faster scans, fewer rescans, and more accurate impressions.

Sharp detail in tight spaces

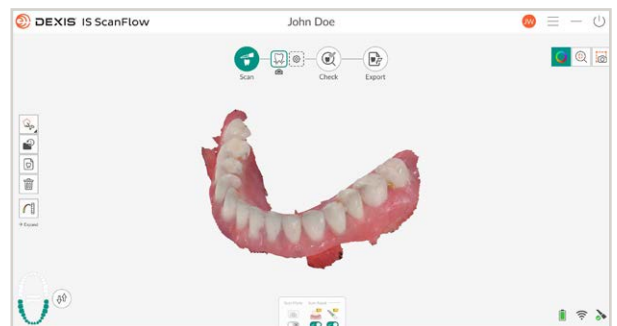

New 25 mm depth of field means you can capture deep preps and tight interproximal spaces with ease, even in complex cases.

Vivid, realistic imaging

Dual sensor technology combines laser precision with white LED lighting to produce ultra-detailed images that are more realistic.

Unmatched speed

A 40FPS frame rate and CUDA powered parallel processing means faster detail and increased data density of final mesh.

“Details in tight spaces, such as interproximal regions, are much clearer and more visible than in previous versions—evidence of a high-performance, cutting-edge device.”

-Leonardo Franchini, CDT

Sleek, new hardware to maximize patient and operator comfort

Autoclavable, standard tip
Smaller tip for maneuverability and comfort.*

20% slimmer
Slim, ergonomic design for operator and patient comfort.*

LED status ring
Quickly see the status of the scanner and scanning process.

Gesture-based smart control
Rotate the model on-screen with hand gestures - even from across the room.

“This intraoral scanner is a game changer - lightning fast, incredibly efficient, and backed by software so flexible it adapts to any clinical workflow with ease.”

-Dr. Matthieu Rousset

“Imprevo really is very fast. I recently used it to scan a relatively complex case and I was surprised by how well it handled it without issue.”

-Dr. Andrew Johnson

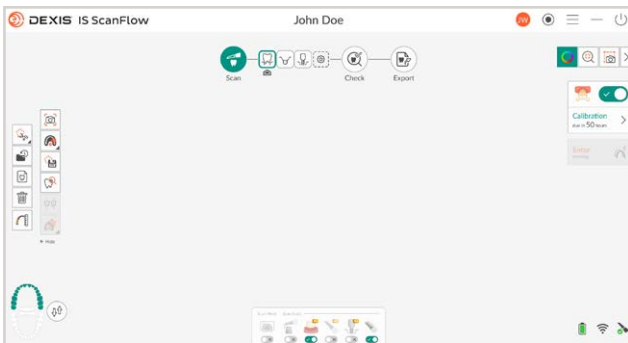

Streamline your workflow through three simple steps: Scan, Check, Export

Customize your workflows

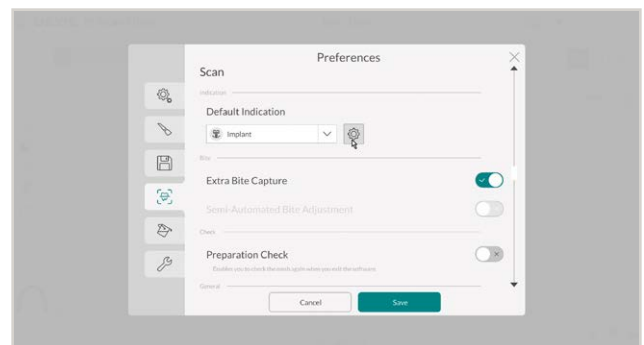

Easily configure your scan tools before scanning

Build your image toolbar by selecting tools from an expanded set - up to eight tools can be displayed at once, with recently used tools appearing at the top.

Save your default workflows

Jump straight into scanning by saving your most commonly used workflows.

“The evolution of the accompanying software, DEXIS IS ScanFlow, makes the entire experience smoother and more pleasant - both for the clinician and the patient.”

-Dr. Carlo Massimo Saratti

Give your labs what they need to perform their best work

Clear, accurate data

New imaging technology makes delivering accurate scans easy, even in challenging situations.

Simplified prescription creation

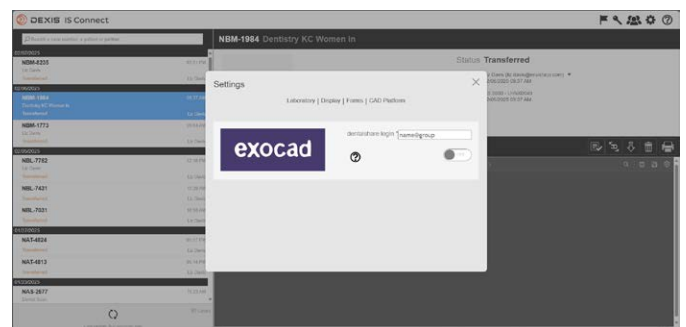

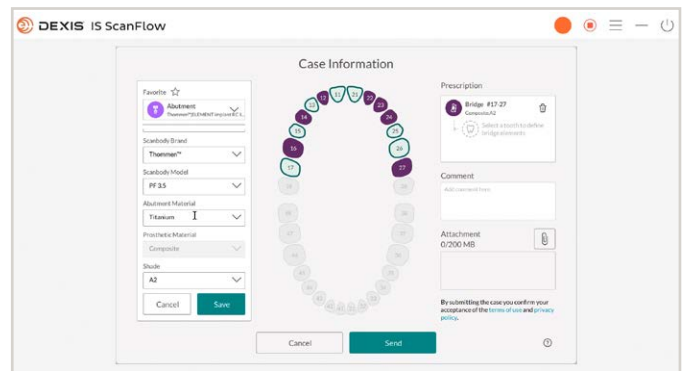

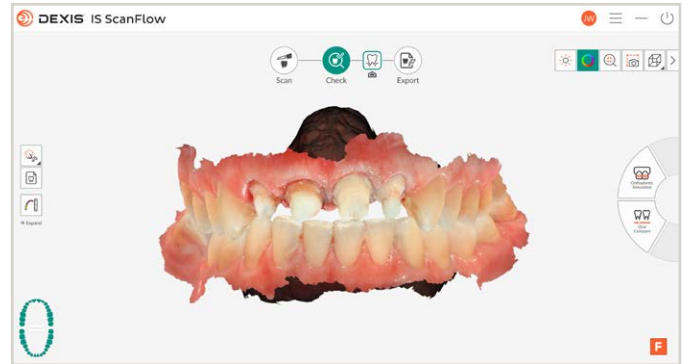

Everything from selecting materials for prosthetics to adding detailed ortho indicators - your prescription process is faster and clearer.

Cloud sharing

Share and access datasets from anywhere.***

exocad integration

Direct import of scan data into your lab's design software without needing manual file conversions or transfers - easier for them and faster for you.

“The texture capture with DEXIS Imprevo has been enhanced, making the integration between mesh and texture seamless. The result? Sharper margin definition and exceptional accuracy in prosthetic design.”

-Thibaut Thomas, LDT

Bring your treatment presentations to life with advanced tools designed for visual communication

Through IS ScanFlow and its direct integration with DTX Studio™ Clinic, your treatment presentations could go a lot like this...

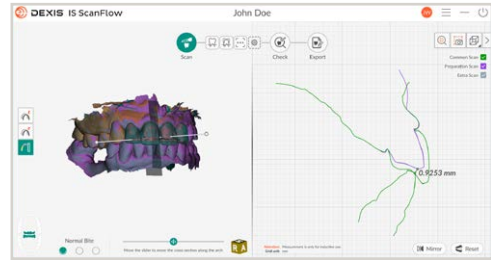

“It’s like we’re standing on the tooth. I can show the patient where they have wear or other issues, so they can understand what’s going on. This leads to increased treatment acceptance, which also increases my productivity.”

-Dr. John Zalesky

Visualize progressive dental issues

Overlay scans from across a timespan to visualize subtle changes like erosion, wear, and recession.

Set your full case up in seconds

Combine your intraoral scan, 2D images, and CBCT scans in DTX Studio Clinic - and watch as AI sets up your case in seconds.

Plan your treatment in minutes

Give your patients the ultimate confidence by showing them their diagnosis and planning their treatment without ever leaving the room.

Mobilize your scanning setup

Streamline activity between operatories with a mobile scanning setup that's lightweight, highly maneuverable, and built to integrate with your practice's flow.

- High-performance GPU for enhanced graphics processing
- Larger SSD for more storage capacity
- Support for advanced AI features

“You’re offering more comfortable patient treatment and you’re improving team efficiency.”

Case Study
Elevating Digital Dentistry with Innovative Intraoral Scanning
DEXIS Imprevio: Engineered for Excellence, Designed for Modern Dentistry

At DEXIS, we're committed to delivering innovative solutions that elevate clinical outcomes and streamline workflows.

The DEXIS Imprevio intraoral scanner exemplifies this commitment—combining speed, precision, and ergonomic design to empower dental professionals and enhance patient experiences.

Driving Efficiency and Patient Comfort at Zalesky Dental
Dr. John Zalesky, a leading practitioner in Colorado, integrated the Imprevio solution into his digital workflow and quickly saw transformative results. With scan times as fast as 25 seconds per arch and immediate access to high-resolution imagery, Dr. Zalesky and his patients benefit from faster, more comfortable appointments and improved case acceptance.

“Patients can see exactly what I see,” Dr. Zalesky shares. “The clarity of the scans helps them understand the need for treatment, which makes conversations easier and more productive.”

dexis.com | 888.883.3947

See how Dr. John Zalesky, owner of Aurora Hills Dental Care, became more calculated with his workflows using Imprevio and IS ScanFlow 2.0.

Learn how he used the tools to not only open up more chair time, but also enhance his patient experience and improve case acceptance.

Frequently asked questions

Can I continue to work with my preferred lab partners?

Absolutely. IS ScanFlow is a completely open system - so as long as STL files are accepted, we can work together! See our validated list of partners.

Can I easily send my digital impression data to a 3D printer?

Definitely. IS ScanFlow shares a direct integration with SprintRay™ - or export your data as an STL file and easily use any 3D printer of your choice.

How long does it take to charge DEXIS Imprevio batteries using the optional battery charging station?

A completely discharged battery takes approximately two hours to charge for one hour of continuous usage.

How long can a customer expect to scan with a fully charged Imprevio battery?

Customers can scan for one hour continuously with a fully charged battery.

Connect your entire workflow, from diagnosis to delivery

The DEXIS digital ecosystem is your all-in-one imaging solution - combining 2D and 3D imaging, intraoral scanning, diagnostics, and treatment planning into one integrated workflow.

“Having all my technology integrated in one place is a game-changer. It saves time, reduces errors, and improves the overall quality of care we provide.”

-Dr. Lupe Poussin

About DEXIS

DEXIS is the global leader in dental imaging. We bring together the most trusted brands in 2D and 3D imaging, intraoral scanning solutions, and diagnostic software, in one connected and AI-powered ecosystem. Our innovative and award-winning technologies use smart simplicity to increase productivity and enhance diagnostic confidence.

*Compared to previous DEXIS intraoral scanners. **The UPS is only available in the United States and Canada. It is included in bundles that feature both the trolley and AIO, and it is also available as an accessory. ***Available only in the US
